Concept | Design | Engineering | Installation

About Company

Mr. Chetan Lomte (M.D)- M. Tech in Structures & Earth Quake Engineering (IIT Roorkee) has started Design consultancy in 2011. Over the years we have designed & detailed "N" numbers of projects for Government, Semi Govt. firms & Private sectors to exceed their level of satisfaction.

We are dedicated to provide clients with the most professional & reliable project management, engineering & detailing services available to construct heavy industrial, commercial, educational structures. With entrepreneurial spirit, we built trust ,based on project achievements & performance with our uncompromising emphasis on Quality. Through the years, there has been no place left for errors and we have ensured total client satisfaction, unbeatable market leadership and immense goodwill.

Vision

Kimaya steel's vision is to persistently pursue excellence year after year & achieve market leadership in every segment of our company in most sustainable way.

Mission

To provide enhanced single source turnkey steel building solutions by leveraging our vast resources like superior engineering & technology, innovative solutions, design versatility, expertise & cost effective deliverables. Thus leading the company to expand its presence in steel building realm to surpass the expectations of existing & future clients.

Strength

In House team of highly skilled & energetic engineers, highly efficient plant & site team, equipped advanced machinery gives us advantage in delivering complex projects right from conceptual stage to hand over stage.

Quality Statement

We at Kimaya Steel believe that quality does requires persistent efforts & above all a positive attitude towards achieving it. Our products undergo stringent quality checks. Organization is backed by professional team of experienced engineers. Our name stands for high tech level of knowhow, outstanding quality at an excellent price. There are numbers of inspection instruments that help in providing our customers with consistent quality at all times. Our R&D department anticipates future needs, & an ongoing research in design and technology keeps us one step ahead of competition. The products are being manufactured as per International Standards.

Applications

- Warehouses & Industrial Parks
- Manufacturing Plants & Factories
- Cold Storage Units
- Petrol & Fuel Stations
- Commercial Buildings & Show Rooms
- Sports Stadiums & Recreational Structures
- Institutional Buildings & Malls
- Multistorey & High Rise Buildings
- Multi Level Car Parks
- Aircraft Hangers & Metro Stations
- Roof Top Solar Mounting Structures
- Steel Girders For Infrastructure Projects

WHY CHOSE US?

15+
Years of
Experience

90000
Sqft Area
Manufacturing

800+
Projects
Completed

100+
Engineers and
Staff

Project Excellence is our top priority.

SUPERIOR QUALITY CONSTRUCTION PROJECTS & INNOVATIVE DESIGNS!

Pre-Engineered Buildings (PEB)

Supporting Structures for Solar Panels

"Z" & "C" Purlins

Heavy Fabrication For Infrastructure Projects

High Rise & Multi Storey Steel Buildings

Colour Coated Metal Sheets for Roof & Walls

Innovation to the power of growth
APPLICATIONS AND SOLUTIONS

Warehouses & Industrial Parks

Manufacturing Plants & Factories

Cold Storage Units

Commercial Buildings & Show Rooms

Sports Stadiums & Recreational Structures

Multi Storey & High Rise Buildings

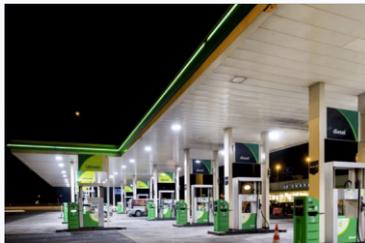

Institutional Buildings & Malls

Multi Level Car Parks

Roof Top Solar Mounting Structures

Petrol & Fuel Stations

Aircraft Hangers & Metro Stations

Steel Girders for Infrastructure Projects
